

Modern Male Barber Academy Barber License Program

Looking to learn a Trade?

Modern Male Barber Academy provides an opportunity for young men and women to learn a trade they can master over time to become a licensed barber and provide an upper-middle-class standard of living for themselves and their family.

Become a Licensed Barber

Once licensed, our graduates are prepared to take advantage of any and all opportunities to begin their career immediately after completing our program.

Advance Your Career

Modern Male Barber Academy is for a person with a high school education or beyond and who wants to learn a profession without taking on the debt of traditional college.

Results You Can Take to the Bank

Our program prepares students for a profitable career in the grooming industry with unlimited upside potential.

Modern Male Barber Academy

Program Details

Our Barber License Program prepares students for their PA State Board of Barber Licensing Exam while focusing on high quality work product, professionalism, creativity, customer focus and business acumen.

Students learn through a combination of theoretical and practical training. Theoretical training takes place in a classroom setting and practical training is conducted on our clinic floor.

We offer client services to the general public so students can apply their skills and further their education. Students must accumulate 1,250 hours for graduation, which takes 10.5 months.

Program Goals

Upon graduation of the Barber License Program, graduates should possess the skills necessary to pass the PA State Board of Barber Licensing Exam. Students can then obtain entry-level employment in the field of barbering, and perform all client services, including haircuts, shaves, facials, and more.

Graduates should be well-rounded in all aspects of barbering. Our program is designed to teach students to develop a professional attitude, desirable work habits, and an entrepreneurial mindset.

Teaching Methods

The MMBAcademy curriculum, developed by Head Master, Nicky the Barba and his team of barber Instructors, is based on the very latest teaching methods. This approach enables our students to learn, practice, and develop their skills in a manner that suites their learning style and natural skill level.

We have developed a unique teaching approach that blends a style of traditional grooming techniques with modern barbering style and flair. Students experience a well-rounded education that positions them for a successful career in the field.

Instructors use a combination of hands-on, interactive training with classroom instruction, including lectures and quizzes, group activities, visual aids, demonstrations, work on live models and a host of other engaging approaches. Our instructors have trained and mentors may barbers on advanced barbering techniques over the years.

* You must be 16 years or older and have a high school diploma or GED. Graduates are expected to pass the state licensure examination and enter the work force as licensed barbers in the State of Pennsylvania.

Students have to accumulate 1,250 hours for graduation, which takes approximately 10.5 months for full-time students.
